

VISHWAKARMA GOVERNMENT ENGINEERING COLLEGE, CHANDKHEDA

Brief Report of Seminar on 3D printing Technology-A Technology of future

Name of Department/Organizer	:	Mechanical Engineering Department
Date & Time	:	05/07/2019
Venue	:	M block, Mechanical engineering department
No of Participants	:	75

• Objective of the Event

Students of **Mechanical Engineering Department** of Vishwakarma Government Engineering College Chandkheda attended seminar on “3D printing- An technology of future”. The seminar was organized to aware students about current trends in 3D printing technology, it’s application and future scope in industry. For the better understanding, demonstration was organized followed by question answer session.

The seminar was organized on 05/07/2019. **Total 75 students** actively participated in seminar.

• Outcome of the Event

After attending the seminar students were able acknowledge

- Knowledge on 3D Printing approach and basic terminology.
- Understanding the advantages and limitations of 3D Printing for different applications.
- Knowledge on the process steps for obtaining an object using 3D Printing technology.
